

RUBBER INSULATING GLOVES

Manufactured by The White Rubber Corporation from the highest quality natural rubber Horizon offer Rubber Insulating Gloves to the European and International Standard BS EN 60903.

Our Rubber Gloves are very flexible allowing more dexterity than traditional latex gloves. Specially contoured, the Gloves are formed to provide the most natural hand shape, thus reducing fatigue in hand muscles. All Gloves are CE marked.

Range

Horizon stock a wide range of Insulating Gloves for various applications. Class 0 are for low voltage working up to 1kV. Class 1, 2 and 3 Gloves are widely used for live working on medium voltage powerlines. Other applications include gloves required for secondary insulation such as switching or use when operating underground moling machinery. Details and sizes of our standard Gloves for Classes 0, 1, 2 and 3 are given in the table below. Other lengths, cuff style and colour combinations are available by special request.

CAT. NO.	CLASS	COLOUR	LENGTH	MAX. USE VOLTAGE	TEST VOLTAGE	SIZES AVAILABLE
14-0-RY	0	RED INSIDE YELLOW OUTSIDE	14" (356mm)	1kV	5kV	8, 8.5, 9, 9.5, 10, 10.5 & 11
