

BATTERY POWERED CRIMPING TOOLS - 'W' DIE & DIELESS

Featured here are Latch and Open Head versions of six tonne tools which use industry standard 'W' Dies and a Dieless tool with a Universal Compression Head. For twelve tonne battery tools please see page B2.

These new generation tools have been redesigned to improve performance. All tools have a two speed hydraulic system to significantly reduce cycle times. Advance speed operates when there is no load on the tool, and then the low speed automatically engages when

resistance to crimping is met. Tools now have improved ergonomic characteristics and feature an auto retract facility. This increased automation of the Crimping Tool ensures securely crimped connections. The operator pulls the trigger and waits for the motor to stop and the ram to retract. This is the signal that the complete crimping force has been reached and the crimp is complete.

An optical indicator provides the operator with details of battery condition and required service information.

ALL TOOLS AVAILABLE WITH SHROUDED HEAD

'W' DIE TOOL - LATCH TYPE HEAD.

Cat. No. EK22-PLUS (Non Shrouded)

Cat. No. EK22-PLUS-INS (Shrouded)

Crimping Force:	60 kN
Crimps per Charge:	approx. 160 crimps
Crimping Cycle:	3 to 6 seconds (depending on crimp size)
Weight:	4.15 kg including battery

'W' DIE TOOL - OPEN HEAD

Cat. No. EK 60 G5 INS (Shrouded)

Crimping Force:	50 kN
Crimps per Charge:	approx. 160 crimps
Crimping Cycle:	3 to 6 seconds (depending on crimp size)
Weight:	4.5 kg including battery

DIELESS CRIMPING TOOL

Cat. No. EK 60 VP-PLUS (Non Shrouded)

Cat. No. EK 60 VP-PLUS-INS (Shrouded)

Crimping Force:	55 kN
Crimps per Charge:	approx. 150 crimps
Crimping Cycle:	5 seconds (depending on crimp size)
Weight:	5 kg including battery

All tools are supplied as standard with Steel Carrying Case, Vehicle Charger and two 12 Volt, 2ah Batteries. Mains Charger, Quick Charger and Spare Batteries are available as optional extras.
