

HAND HYDRAULIC CRIMPING TOOLS

Hand Hydraulic Crimping Tools are offered providing crimping forces up to 130kN. This new generation of tools provide advanced operating features and assure secure crimps. The two stage hydraulic system advances the piston rapidly until contact is made with the connector. It then automatically shifts to a slower speed to complete the crimp. When the full crimping force is reached the tool retracts automatically signalling to the operator that a secure crimp has been completed. If necessary, the tool can be retracted manually by pushing the retract button. A latch mechanism holds the pump lever in the closed position during transport.

ALL TOOLS AVAILABLE WITH SHROUDED HEAD AND HANDLES

'U' DIE TOOL

Cat. No. HK120 (Non Shrouded)

Cat. No. HK120-INS (Shrouded)

Crimping Force: 130 kN
Stroke: 25mm
Length: approx. 510mm
Weight: 5.4 kg

DIELESS TOOL

Cat. No. HK60 VP (Non Shrouded)

Cat. No. HK60 VP-INS (Shrouded)

Crimping Force: 55 kN
Length: approx. 525mm
Weight: 4.1 kg

UNIVERSAL TOOL - CRIMPING, CUTTING AND PUNCHING

Cat. No. HK 60 UNV (Non Shrouded)

Cat. No. HK 60 UNV-INS (Shrouded)

Crimping Force: 60 kN
Stroke: 17mm
Length: approx. 460mm
Weight: 3.3 kg

Accessories for Crimping, Cutting and Punching are shown on catalogue page B3.
