

# BATTERY POWERED CUTTING TOOLS

Battery powered cutting tools feature a two speed hydraulic system which significantly reduces cycle times. Advance speed operates when there is no load on the tool and then the low speed automatically engages when resistance to cutting is met. When the cutting operation is

complete the ram automatically retracts and is ready for the next cycle.

An optical indicator provides the operator with details of battery condition and required service information.

## ACSR and SWA CABLE CUTTER

Heavy duty battery cutter will cut ACSR and Steel Armoured Copper and Aluminium cables. Flip top style cutting head rotates 360°. Two stage hydraulic ram with quick motor stop. Tool supplied as standard with steel carry case, Vehicle Charger and two 12 Volt, 2ah Batteries. Mains Charger, Quick Charger and Spare Batteries are available as optional extras.

Cat. No. ESG45-PLUS

Cutting Force:	60 kN
Max. Cutting Capacity:	45mm dia.
Cuts per Charge:	70 cuts
Cutting Time:	8 to 18 seconds (depending on cable size)
Weight:	5.8 kg including battery

## BATTERY CABLE CUTTER FOR LARGE CU/AL & TELECOM CABLE

Ideal for large, non armoured cables up to 85mm dia. Flip top style cutting head rotates 360°. Two stage hydraulic ram with quick motor stop. Tool supplied as standard with steel carry case, Vehicle Charger and two 12 Volt, 2ah Batteries. Mains Charger, Quick Charger and Spare Batteries are available as optional extras.

Cat. No. ESG85-PLUS

Cutting Force:	60 kN
Max. Capacity:	85mm dia.
Cuts per Charge:	23 cuts
Cutting Time:	21 to 40 seconds (depending on cable size)
Weight:	7.3 kg including battery

## BATTERY RATCHET CABLE CUTTER

Rotating blade, compact design permits use in tight locations. Ideal for one handed use. Easy to switch between forward and reverse direction. Comes complete with 12 volt battery, mains charger and carry case.

Cat. No. ES750-22

Cutting Force:	60 kN
Max. Capacity:	50mm dia.
Cuts per Charge:	20 to 50 depending on cable size
Weight:	7.3 kg including battery
