

HYDRAULIC IMPACT WRENCHES AND DRILLS

HYDRAULIC IMPACT WRENCHES & ACCESSORIES

Fairmont are the most reliable, best performing Impact Wrenches on the market. You'll get the torque required to loosen even the rustiest of hardware. They can drill through a 10" pole in just 3 seconds, while providing comfort and ease of operation for long hours of use. Available in standard or variable torque models with either 7/16" hex quick change chuck or 1/2" square drive.

Naileater II Impact Bits bore through creosoted poles quickly and cleanly, resist wear and chew through nails and staples. Deep Impact Sockets available in Metric, Imperial and Whitworth Sets. Individual socket sizes available on request.
