

ACCESS COVER LIFTERS

Horizon offer a range of Access Cover Lifters to suit virtually any requirement for Link Boxes and Manholes. Designed to help meet HSE Lifting and Handling Regulations and reduce back strain injuries. All are available with standard or custom made keys. A DVD is available on request for demonstration or training purposes

Bull Lifter

Lightweight and versatile, yet powerful and rugged the Bull Lifter optimises leverage capabilities. For use by one person this compact, simple design is available with accessories to suit most applications. An extendable hook allows the operator to lift Bell covers from deep chambers.

Weight: 5kg.

MIDI Lifter

Midi Lifter uses simple mechanical advantage to lift and remove medium duty covers. It can be manufactured to fit any width of cover. Its design give high "break out" forces allowing the user to lift many covers that could not be removed by other means. Lightweight and easy to use.

Weight: 18kg.

Multi Lifter

Extremely powerful and versatile, the Multi Lifter uses multiplication of mechanical effort to achieve high "break out" forces without the use of hydraulics. Designed for single purpose use, the Multi Lifter breaks down into three components for easy storage and transportation. Simple assembly takes only one minute.

Incorporating a range of accessories to suit most applications, the Multi Lifter utilises a self braking hand winch and webbing strap to safely lift covers. The system can also be used to retrieve or raise heavy objects such as Bell Covers from within the access chamber.

Total Assembled Weight: 40kg. Max. Single Component Weight: 18Kg.
