

POWER TOOLS FOR TREE PRUNING

Horizon offer the world class Echo range of power Chainsaws and Pruners. Each Chainsaw is built to the highest quality for maximum reliability, optimum performance and ease of use - over a very long working life. Echo engines start easily and run smoothly with minimum noise and vibration.

Power Pruner

For specialised tree pruning in the proximity of powerlines we feature the Power Pruner.

A reinforced fibreglass housing and drive shaft are designed to provide protection against accidental contact with overhead powerlines. The Insulated Power Pruner is 2.13m long with a 1.5m extension piece available for extra reach. Powered by a 24cc engine with a 30.5cm Chainsaw head, the Power Pruner has a top mounted handle and comes complete with a shoulder strap to ensure the tool can be handled with ease.

Accessories

In addition the following accessories are available which can easily be interchanged to replace the chainsaw head.

HCA2400 - Power Pruner Hedgecutter. 45cm long blade adjusts to 7 different angles through an arc of 90°.

RBA2400 - Power Pruner Rotating Blade Hedger for trimming and shaping hedges and foliage up to 35mm thick.

CSA2400 - Power Pruner Circular Saw capable of cutting through the thickest of branches.
