

POLE EQUIPMENT

STAYWIRE MARKER

This unique Spiral Staywire Marker is quick and easy to install by simply wrapping each coloured half around the staywire and back onto itself to form a tube, encompassing the staywire. Installs in seconds and can be cut to any length required. Highly visible, manufactured from low density polyethylene. Standard colour - Yellow/Black, other colours are available on request. Spiral Marker can also be used around conductors in areas where temporary coverage is required prior to tree trimming operation.

CANT HOOK / POLE TURNERS

Available with fibreglass or steel handles, Cant Hooks are ideal for turning wood poles to the correct orientation. Also available, fibreglass Pole Turning Tool with nylon strap ratchet binder which does not damage wooden poles. This tool can also be used for turning concrete, steel or fibreglass poles.

CAT. NO.	DESCRIPTION
6705	Cant Hook with 1 3/4" (4.5cm) dia. x 36" (91cm) long Fibreglass Handle
ESVK	Cant Hook with offset Steel Handle incorporating Breaking Bar. 31" ((79cm) long
6856	Pole Turning Tool with Ratchet Strap. 48" (1.2m) long x 2" (5cm) dia. Fibreglass Handle

POLE NUMBERS

Made from durable, UV resistant plastic our low cost, pole numbering system is quick and easy to install. The back plate is supplied in 2 metre strips, is flexible and can be cut to any length. Numbers slide easily into back plate. All numbers and letters available. Characters nominally 25mm high.

POLE COVERS

Pole Covers are used where replacement poles are being erected through live conductors. Will fit poles from 6" (15cm) to 11" (28cm) diameter. Each Pole Cover is 42" (1.06m) long and has rope handles enabling the user to easily open the cover and place on to the pole. Can be used in multiples to cover long lengths of pole. Manufactured from natural polypropylene.
