

# Skipper™

## Retractable Barrier System

The unique, patented, versatile Skipper Barrier System is designed to cordon off any area to create a safer work environment.

### FEATURES AND BENEFITS

- The high visibility, fully retractable tape extends to 9 metres, reducing the amount of cones required.
- Locks in any position.
- 360° Directional.
- Saves time, storage space and money.
- Robust and durable. Weighs only 800gms.
- The Skipper unit has a removable top for additional attachments, i.e. Lights/Signage.

Skipper Safety Lamp Attachment available soon

Skipper Warning Sign Attachment

- Spring Loaded Spool ensures tape is held in tension, even if cones move.
- Screw Hole allows Skipper to be permanently attached to cone, if required.
- Lockable Button to prevent unwanted spooling of tape.

- Other colours available such as Yellow and Black for use in Sub-Stations.
- Custom designed tapes available with company logo etc.
- Wall / Vehicle attachment point available - enables Skipper unit to be used with one cone only to barrier off up to 9 metre area.

Please note Skipper system should not be used to replace solid barriers around manholes, excavations etc.
